Education

National Institute of Technology Hamirpur , Bachelor of Technology in ECE (CGPA - 8.71/10) Nov 2022 – Present
Spring Dale Public School, 12th Board CBSE (95.6%) May 2021

Technical Skills

Languages/Frameworks: C++, C#, .NET Framework, JavaScript, SQL, React.js, Node.js, Express.js
Computer Fundamentals: OOPs, DBMS, Computer Networks(CN), Operating System(OS), System Design
Tools: Git, Docker, GitHub, Postman, Vercel, MATLAB
Databases: MongoDB, MySQL, MongoDB- Atlas, Dataverse

Experience

BlackRock — Software Engineer Jan 2026 – Present

Dynamics Solution Centre (DSC) | Aladdin Platform

Tech Stack: React, C#, .NET Framework, JavaScript, Dynamics CE, Power Platforms, REST APIs

- Contributed to building C# plugins and Power Automate flows processing **1.6M+ production records** with **concurrency controls**, **SPN optimization**, and **throttling**.
- Developed **React/TypeScript** UI components and form logic on enterprise CRM, enhancing large-scale operational workflows..
- Built full-stack internal tooling using C#, **gRPC**, **REST APIs**, and **SQLite** — spanning backend services, data layers, and API integration across enterprise systems.
- Applied **SOLID principles** and **Object-Oriented design** to develop scalable, maintainable, and testable enterprise codebases.

Projects

Dock-IDE Coding Platform: 📄 Github URL

Tools Used: Nodemailer, OTP-Generator, Monaco-Editor, File-Saver, Express.js, Jsonwebtoken, React.js, Postman

- Developed a fully functional web-based IDE with support for real-time code editing, project creation, deletion, and code download functionality, allowing users to code in up to 7 programming languages.
- Implemented secure authentication using OTP-based email verification (**Nodemailer, OTP-Generator**), ensuring account security and preventing unauthorized access.
- Tested by **10+ users**, who created and saved over 35 projects during college workshops and study group activities.

ChessVerse - Backend Project: 📄 Github URL

Tools Used: Express.js, Chessboard.js, Socket.IO, Node.js, Uuid, Chess.js

- Built a real-time multiplayer chess platform supporting two-player gameplay, featuring seamless turn-based interaction, robust game state updates, and **sub-500ms latency**.
- Successfully hosted 10+ active game sessions, engaging 50+ players during the college hackathon and demo phase, enabling **20+ unique viewers** to watch a single match.

PHOTO-LYTICS (SaaS Application): 📄 Github URL

Tools Used: Razorpay, Express.js, React.js, Bcrypt, Clip-drop API, Postman, Render

- Created an AI-powered platform that translates textual descriptions into detailed images, achieving 90% positive feedback during initial testing.
- Enforced **Razorpay**(TEST MODE)integration for efficient and secure payment gateway, enabling 15+ trial subscriptions.
- Successfully generated over 70+ high-quality AI images and maintained a **97% success rate** for error-free image generation.

Achievements

- Secured **1st place** in **Electrothon 5.0** (300+ teams) by building TuitionMaster, a scalable mentor–student matching platform to connect students with mentors beyond geographical barriers.
- Solved **900+ Data Structures and Algorithms** problems across platforms like **LeetCode** and **GeeksforGeeks**, strengthening problem-solving and algorithmic skills.
